About

Hello! I'm **Albin Binu**, a Computer Science student at the **College of Applied Science, Thiruvambadi**. I'm deeply passionate about **programming**, with a strong interest in **backend development** and **object-oriented languages** like **Python** and **Dart**. Currently, I'm exploring **Flutter** to build cross-platform mobile applications and further develop my **app development** skills.

While I find **mathematics** and **web design** (especially CSS) challenging, I genuinely enjoy solving problems related to **data structures** and backend logic. My design skills are a work in progress, but I prioritize writing **clean** and **functional code**. I'm committed to continuous learning, improvement, and building practical software solutions—one step at a time.

Certificates

Introduction to Python – SoloLearn

Completed: August 2024

Successfully completed a beginner-level course on Python programming. Covered topics included variables, data types, control structures, functions, and basic object-oriented concepts, along with interactive coding challenges to reinforce learning.

Introduction to C – SoloLearn

Completed: August 2024

Completed a foundational course on C programming. Topics included syntax, data types, operators, control flow, and function structures—laying the groundwork for system-level programming and logical thinking in low-level languages.

Industrial Visit – Cybrosys Technologies

Participated: December 2024

Participated in a one-day industrial visit at Cybrosys Technologies. Gained valuable exposure to real-world software development environments, including insights into project workflows, team structures, and development tools used in the IT industry.

SKILLS

HTML	Css	JavaScript		
React Js	Python	C	C++	
Dart	Flutter	Sql		

HOBBIES

 Music

 Movies

 Traveling

 Cooking

LANGUAGES

- Malayalam

Projects

Portfolio Website

A fully responsive personal portfolio website built using **React.js** and **Bootstrap**. Includes features like animated components, contact form, social media integration, dark mode support, and project showcasing—all optimized for smooth navigation and accessibility.

College Website Clone

Recreated the official College of Applied Science, Thiruvambadi website using HTML, CSS, and basic JavaScript as a learning project during my first year. While not responsive, the project helped me understand web page structure, semantic HTML, and styling fundamentals.
